

WEB PROGRAMMING AND APPLICATIONS (503073)

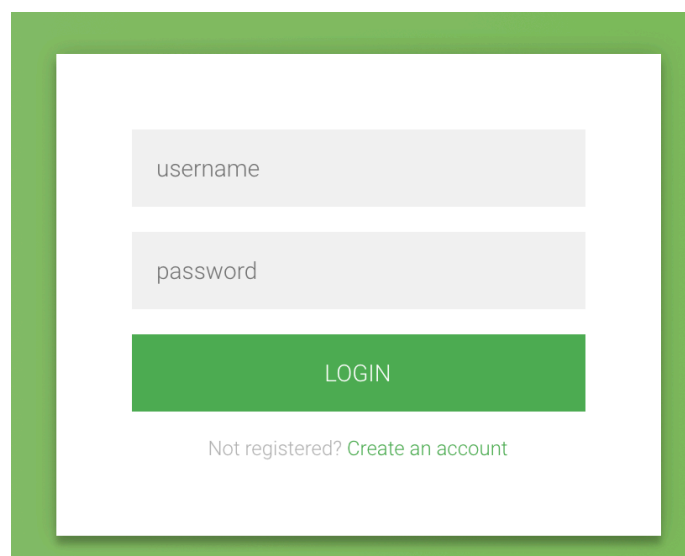

WEEK 9-10

Prepared by Mai Van Manh

Exercise: Build a website that sales mobile phone. The website should have the following functions:

- Show list of products.
- Allow user to buy products.
- Shopping Cart Management.
- Make a payment and save purchase history.

Sample screenshots:

A mockup of a login screen. It features a white rectangular area with a green border. Inside, there are two light gray input fields: the top one is labeled 'username' and the bottom one is labeled 'password'. Below these fields is a solid green button with the text 'LOGIN' in white. At the bottom of the white area, there is a link that says 'Not registered? Create an account'.

Login screen

- Customers can view the product list without having to log in, but to purchase goods, customers must log in.
- If a customer attempts to access the cart page without signing in, the site will be redirected to the login page.

Shop Name

- Category 1
- Category 2
- Category 3
